

1. What is Kargyr?

Kargyr is the fusion between modern progressive metal and eastern harmonies, designed to ease your ears and make your head bang!

2. Credits

Short credits related to EP material:

Fanny BORREGO-SANCHEZ => communication strategy, management and visual artist

Clémence LEROUX => visual artist, cover artwork

Pierre-Alexandre KOFRON => lyrics co-writer for "Chronophobic"

Thibaud FLORENTIN => guitar solo on "The Abyss"

Special thanks to:

This project could have been born without the help, patience, ears and inspirations of the incredible people listed below:

First of all the beautiful Fanny for her endless support & energy, even when I shout in her closet (my very first recording studio) even when I ask her for the 100th time what a linktree is even when I ask for impossible photoshop jobs even when I put on loud cheesy french music in the car

Thank you to my forever slavic partner PAK ([@twopapak](#)) for his wise advice during my very first masterings tryouts, and for his creativity at the heart of the "Chronophobic" lyrics!

Thank you to my older brother Thibaud! Without him "The Abyss" wouldn't have its crushing guitar solo, and my life wouldn't have any music at all!

Thank you to Aurelie, for these countless hours spent together making weird vocal noises!

Thank you to Clemence for the making of this awesome album cover, full of beastiness & overall coolness

3. The artist

Metalhead since my teenage days, I started drumming at the age of 12 and electric guitar some years later, pushed by the advice and technical awesomeness of my big brother. After 2 EPs a first album recorded with my previous band Open Fly in 2009 here I am 10 years later, thinking "oh gosh I love extreme vocals but I need a teacher"...I then start my extreme vocal training, which before all taught me to sing in a healthy manner!

January 2020, time for new life goals! I know how to drum, how to play heavy guitars and extreme vocals...everything is here to make my dream come true: write, record, mix, master, distribute and promote my first solo EP! My girlfriend's closet seems like a good place to

start recording...I then use my creativity to build the cheapest home studio ever seen, with a vocal recording cabin made out of 6 mattresses!

4. Upcoming EP (out april 26th on [Little Rascal Records!](#)) & Musical Influences

“Kargyr” proudly uses various influences taken from many metal genres (bands like Opeth, Hacride, Meshuggah, Gojira, The HU, Alien weaponry) and adding some exotic eastern harmonies. Your travel companions will be heavy distorted guitars, supported by 2 voices: one clean and etheric and his evil saturated twin.

5. May advice to other upcoming yong artists such as myself

Never give up! And never tek yourself too seriously :)

Be true to yourself and your artistic character.

Step out of your artistic confort zone, and go get that exotic inspiration!

Jam, experiment!
